## Introduction

Greetings and I hope you enjoy learning my solo fingerstyle guitar arrangement of "Fly Me to the Moon" from the videos in the Members-only "Watch and Play" area of [StudyWithAdam.com](http://StudyWithAdam.com).

**I very common question I get is "Adam, where are the tabs /sheet music?"**

Unfortunately I can't give out tabs if I have no print "license." Yes, it sucks.

Some students are having a hard time remembering all the details, fingerings and chords I show in a video (and I can totally understand - it is a LOT of information.)

I have been wondering how to solve this problem...and *(drum roll please)*

## The Solution? A Help File, Of Course!

So, here's what I will try, and I am looking forward to your feedback.

**Here's what you'll get in this first 'Study With Adam' help file:**

- You'll get any riffs that I have composed that are not the SONG MELODY will be included.
- You'll get blank tab lines where it is the SONG MELODY and there, you can easily pencil in tabs as you are watching the video.
- You'll get only tabs, no notation included. Keeps it easy on the eyes.
- You'll get overall song structure & chord changes are shown.
- I have marked which Video Lessons correspond to the musical sections for easy reference as you watch.
- *All videos show the full TABS on screen as I play. You can literally copy them off the screen onto the paper.*

**Now you have a printable, organized document to help you stay on track as you learn to play "Fly Me To The Moon".**

*(Tip: Be sure to print only the pages you need, that blue-green cover page could use up all your ink or toner!)*

# Overall Structure to the Guitar Arrangement of "Fly Me To The Moon"

## Intro

In the style of Count Basie

## the 32 bar song

32 bars = one "chorus"

## Solo Chorus

One time through the song structure,  
sounds like a big band &  
bass trade off every 8 bars

## Shout Chorus

One time through the song structure,  
sounds like a big band &  
main melody trade off every 8 bars

## Tag

A cycling chord progression to build  
intensity, often used by Count Basie

## Riff & Ending

Oscar Peterson piano lick &  
Count Basie ending

# **"Fly Me To The Moon"**

## **Video Lesson Overview**

Ok, this is a pretty large number of videos - 15 in all. Each one is 8-10 minutes, but I play everything slowly and nothing is rushed. You can sit with your guitar in your hands as you watch & learn - and play along with me.

Allow yourself at least one full week, if not more, to learn this arrangement.

### **Video 1: Getting Started**

Very important info here, please watch this and don't skip it! In this lesson I go over key points & techniques to get you on the right track.

### **Video 2: The Count Basie Style Intro**

I'll show you an easy and a tricky version. Tabs included in this help file.

### **Video 3: Melody Bars 1 - 4**

I guide you through how I add chords, bass and groove to the melody.

### **Video 4: Melody Bars 5 - 8**

Song, continued.

### **Video 5: "In Other Words" - Melody Phrase 3**

When this song lyric comes, I have a special right hand technical approach to the melody phrasing..

### **Video 6: 2nd Half of Tune**

Most jazz standards are 32 bars. The 2nd 16 bars is almost identical, but ends differently, so I show you the ending in this video.

### **Video 7: Big Band "Solo Chorus" Part 1**

Here's what the virtual big band would play for 8 bars

**Video 8: Big Band "Bass Solo" Part 1**

The bass will pick up the melody here at "in other words", for the 2nd 8 bars of the solo chorus

**Video 9: Ending the Solo Chorus**

All the material repeats from Video 7, but has a slight twist at the end.

**Video 10: The Shout Chorus Part 1**

A shout chorus is a BIG finale style big band figure. We'll use a SHOUT to vary the recap of the song.

**Video 11: The Shout Chorus Part 2**

The second repeat ends slightly different.

**Video 12: The TAG Part 1**

A TAG is a cyclical chord progression that builds intensity...Count Basie and many jazz greats used these a lot.

**Video 13: The TAG Part 2**

Various rhythms / right hand techniques on basic chords for this section.

**Video 14: Oscar Peterson Riff & Count Basie Ending**

I end the arrangement with a cool "jazz line" that outlines the chord changes, and a stock Count Basie ending.

**Video 15: Recap & Song Structure**

You'll get overall performance notes here - very useful AFTER you have been deep in the details.

**Remember give this time and don't expect overnight results. It's a BIG project, and you will need to chip away at it. Contact me anytime or post videos as you learn the various sections of the song. Enjoy!**

*"So far, my favorite song on the DVD is the opening cut, a very pretty ballad in Drop D tuning called "Jill's Song."*

*Because it is slow, "Jill's Song" may be the easiest one to learn.*

*Adam first plays a perfect rendition of the tune, and then spends a solid 20 minutes walking us through the tune, note for note, phrase by phrase.*

*Nothing is left to guess work, as all fingerings are discussed, as well as the subtleties needed to play the song well. Adam's understanding of music is deep, and a lot of important points are covered in a way that cannot be conveyed by TAB alone."*

**No music reading required!**

*"Adam, I just got the video today, and just finished watching it all the way through. Fantastic!! I can't get over how good it is!"*

*Very professional look, polished, easy to follow, etc., etc.. It really inspired me to pick up the guitar and play along.*

*The close-up on the hands and inset of picking is great, and makes it all very easy to follow. I watched while you spoon fed the lines to me and it worked perfectly. No problem keeping up with what was happening. Has that relaxed feel like you are there in the same room.*

*It is really cool the way you play the lines with different feels. The ad lib stuff (here's something Wes would do, how to play 3/4, etc.) was great. I could go on and on, but the bottom line is this a really great video!!!*

*This is as good as any video in my collection, if not the best. I can't wait to start really working on these lines.*

*I have a gig tonight, and feel really inspired to play, and try to apply these lines and the feel. I would absolutely recommend this video to friends. Thanks so much - I'll get a lot of use out of it. Like I said before, can't wait to spend so more time working through the material. Thanks, -Kurt"*

# How You Can Develop Virtuoso Picking Technique Quickly and Easily...

**Have you been wanting to improve your guitar technique but just didn't know how to go about it?**

Do you find yourself "digging in" too hard and getting stuck in the middle of fast passages?

Do you ever feel unsure of the proper fingerings that enable you to execute a musical idea?

Well, jazz guitarist Adam Rafferty has completely solved these problems for you along with many others encountered by most guitarists playing today.

Your Problem is Solved...

Adam's amazing new manual called "How to Develop Virtuoso Single Line Technique for Jazz Guitar" with exercises and diagrams including complete fingerings will provide you with a daily 15 minute routine enabling you to develop a "touch" that will have you gliding through lightning fast solo passages easier than you could ever imagine!

And what's more this **easy to follow, step by step approach is so simple** that even a child could do it!

**Find Out More:**

[http://adamrafferty.com/store/virt\\_book.php](http://adamrafferty.com/store/virt_book.php)

"Dear Adam,

*With the time I spent working on Exercise one, it has already paid off. I have been going through the Hanon exercises and working on just playing at fast tempos.*

*I am seeing some excellent progress in my playing. Last Saturday night I played a gig with my regular top 40 (oldies top 40) band and not only did I feel that I was more relaxed on the up tempos pieces but that my playing in general was more relaxed.*

***Speed wasn't an issue that night.***

*If I had been the only one to notice it would have been good but the whole band really commented. The Bass player, who is very critical, commented that it was like I was 'On Fire'.*

*I know that I will keep it up and it will really pay off. I work a 50 hour a week job and have a family so I get in a little over an hour a day on average practicing and this is now part of my routine."*

# "How to Create Single Note Jazz Guitar Lines That Outline Chord Changes"

## Find Out More:

[http://adamrafferty.com/store/lines\\_book.php](http://adamrafferty.com/store/lines_book.php)

Do YOU want to expand YOUR jazz vocabulary?

Do YOU want to play solo lines over "tricky changes" with ease and fluidity?

## Here's What You'll Get:

You'll get a 104 + page spiral bound book (lays flat on your music stand)

You'll get mp3's (as a download) of the book's musical examples - you can hear them at the touch of a button!

You'll get a step by step method, included with Homework assignments at the end of each chapter

You'll get example solos with full explanations for Coltrane's "Giant Steps"

You'll get several II-V-I lines in both major and minor keys

You'll get a full-blown explanation of when to use notes outside the harmony vs. notes inside the harmony

You'll get "absorbition techniques" which "teach" you ears, eyes, fingers and brain to absorb new harmonic material!

*"Adam, Thank you for another great workshop and an AWESOME new Book on how to 'create single lines that outline chord changes'!"*

*I really admire your abilities not only as a guitar player but as a teacher. You just get to the guys. You seem to have no insecurities about any of it and you are so encouraging.*

*I've been working on the new book and can already see something happening. My Dad, who was a great piano player, told me before he died "really, everything you need is in here."*

*Of course I never understood how to get piano concepts onto the guitar.*

*It is so great that you put it together in a usable form for guitar guys. I think you are really on to something. Thank you for unlocking some new, awesome territory for me. You are the best Adam, thank you.*

*From the Laptop of Adam Rafferty*

Greetings Fellow Guitar Player!

It gives me great pleasure and joy to teach you the guitar and musical concepts and secrets I have learned over the years.

I have been very lucky to have the opportunity to study and play with some of the greatest musicians on the planet, from fingerstyle, to classical music to blues to jazz, and I look forward to passing as much on to you as I can.

Two things that my great teachers taught me are that 1) there are no shortcuts, but 2) it's easy when you get the right information!

I made a "pact" with myself anytime I'd feel the "elation and delight" of unraveling musical mysteries, that I'd pass the knowledge on as best I can. This is the process of how music and learning evolve. Each generation builds on the information from the previous one and this continually raises the standard of excellence.

I also made a pact that I'd be a teacher (for you) that the "proof would be in the pudding". I.E. - you'd want to learn from me because you actually love the music you hear come out of my fingers!

No matter what anyone's level of talent is, we all need teachers and people who have seen things we haven't, and basically "been around the block" more than we ourselves have.

Your excellence matters to me. Your level of joy and creativity matters to me. Your happiness matters to me! And I thank you for entrusting me to share my knowledge with you.

I am here to coach you, teach you, kick your butt and show you how excellent you can be. Feel free to call or email me anytime for lessons, coaching, questions or just to say "Hi!" As well, if you have any questions about any of my online lessons or guitar educational products, call me.

I am here to help YOU realize your true excellence on the guitar, in music and in life!

With Warmest Regards,

Adam
